

PHYSIOLASER 1000

30 PROGRAMS

23 Health&Rehab – 7 Beauty&Fitness

Physiolaser 1000 accelerates the inflamed tissue recovery, regenerates cells and improves microcirculation.

Physiolaser 1000 is especially effective in all the situations where the muscle/articular tissue is inflamed. Inflammation is usually due to a reduced micro-circulation. In return the circulation reduction decreases the blood quantity arriving to the cells, causing an ischemic damage.

Reducing the ischemic time, **Physiolaser 1000** reduces the pathology duration and the relative pain.

Physiolaser 1000 accelerates the healing and the pain elimination both used alone and together with other therapeutic modalities. It allows in this way to reduce the use of analgesics and anti-inflammatories.

Physiolaser 1000 enhances the natural healing body process without pain.

- 23 Health&Rehab programs
- 7 Beauty&Fitness

Programmable: in multi-spot mode and scansion mode

The main therapeutic effects are:

- Anti-inflammatory effect
- Anti-edemigenous effect
- Biostimulating effect
- Analgesic effect

Physiolaser 1000 enhances the natural healing body process.

TECHNICAL FEATURES

Medical Device of II b class

Laser of IV Class

Power (CEI EN 60825-1): 1000 mWatt

Beam divergence: 13°

Laser type: Ga Al As Diode

Beam length: 808 nm

Spot size: 3.5 mm and 11.5mm

Operation mode: continuous and pulsed

Programmable: in multi-spot mode and scanning mode

In compliance with the directive 93/42/CEE - 2007/47/CEE

EQUIPMENT

1 Carrying case

1 Physiolaser 1000 unit

1 Handpiece Laser

1 pair of glasses for the patient

1 pair of glasses for the operator

1 Operating manual

1 power supply

GLOBUS

PHYSIOLASER 1000

Program List

Health

Arthrosis
Ankle sprain
Knee pain
Ankle Sprain edema
Meniscopathy
Knee osteoarthritis
Achilles tendinitis
Finger pain
Myofascial pain shoulder
Articular pain shoulder
Epicondylitis
Frozen shoulder
Carpal tunnel
Chronic back pain
Acute back pain
Back pain with radiculopathy
Neck pain
Neck pain with radiculopathy
Myofascial neck pain
Neck osteoarthritis
Temporomandibular pain
Tendinopathy
Wounds

Beauty

Breast stretch marks
Thighs, hips and gluteus edematous cellulite
Thighs, hips and gluteus orange peel syndrome
Body fat and spread cellulite
Stretch marks
Scars
Localized lymphatic stasis
